

CIRCUS

VYVEY PRO MODEL

Characteristics:

The Circus is a board which fits all freeride conditions. It has less rocker for early planing and will shoot you upwind. The edge is easy to hold when overpowered and finding the right pop for your first jumps is a breeze.

True, JN KPWT Pro Leander Vyvey pulls his tricks with the Circus, but new kitesurfers will also find it very easy to control.

The Circus is eye candy for those who like something a little unique in its design.

For a comfortable freeride board with no limits when it comes to freestyle, look no further.

Construction:

- Paulownia Woodcore = 300g lighter per board than cottonwood/poplar
- ABS sidewalls
- Flexible tips
- ICP sheet for durability
- Reinforced fibreglass heelplates (600g/m)
- Slight concave

Size / Weight:

133cm - 2.4kg
136cm - 2.7kg
138cm - 2.9kg
